services

what we offer

DESKTOP COMPUTING POWER
Computer labs are where we got our start. From software applications to hands-on technical environments, we provide all the technology your team needs to learn effectively.

FULL TECH SUPPORT
It would be nice if our computers and laptops would always function well when it's time to make a presentation. But no matter how much you prepare and test your equipment before your event, sometimes it just fails when it's needed most.

BUILT-IN PRESENTATION EQUIPMENT
All of our training rooms come complete with full presentation equipment. Projectors that allow you to display your presentation in full HD, and can be easily seen by everyone in the room.

FLEXIBLE FURNISHINGS WITH CUSTOMIZABLE LAYOUTS
Your events have special requirements; whether it's due to the number of attendees, or perhaps they need tables to work on. Perhaps they have additional requirements or mobility issues. Or something as simple as wanting to encourage collaboration by setting up small groups together. We'll make sure that your workshop fits you and your attendees, rather than trying to fit you into our space.

FREE WIFI
Something as simple and ubiquitous as Wi-Fi should not cost you extra. In our fully connected world, it is expected that for your workshops and training events your attendees come prepared with laptops and personal devices and are ready to take notes and share information.

WHITEBOARDS
All of our rooms have fixed glass whiteboards. White boards are cleaned after each meeting for confidentiality reasons, and can then be re-used.

NATURAL LIGHT
Amazing large windows allow for all natural light to come into all of our training rooms, which comes from fruitful garden that can be used during breaks.
